Test engineer / Software engineer (f/m/d)

Pure infotainment is really your thing?

Our teams check all the features of the future premium-car-cockpits.

Join our infotainment team as a passionate **test engineer / software engineer** (f/m/d) to start as soon as possible.

Your tasks

- Analysis, development and testing of infotainment systems
- Interpretation and evaluation of logfiles of the automobile bus systems
- Implementation and customization of testcases
- Detecting of the measuered errors and communication to the customer
- Testing of communication modules and backend-testing

Your profile

- Completed education as an engineer (electronic/mechatronic/telecommunication or automobile technology)
- Ideally good knowledge of data communication in vehicles (CAN, Ethernet of advantage)
- Experience in testing of electronic devices and defect management
- A dedicated, team-oriented and reliant personality
- Independent and responsible work
- Strong English communication skills (ideally German language skills)
- Driving license and driving experience
